Summary

Creative professional with a club management and mass event background, including managing Front of House at TEDxVITAP 2024 and visual design for 500+ guests. Technology enthusiast with hands-on experience in crypto wallet scrapers, Raspberry Pi Wi-Fi auditing, and a homelab for real-time attack-defense simulation. Awarded with podium rankings at national and college-level hackathons.

Experience

MagicBricks

Technology Department Intern

Noida, Delhi (On Site)

Jan 2026 - Ongoing

- Explore Artificial Intelligence and the use of AI Chat bots & Large Language Models.
- Understand and learn Prompt Engineering to ensure desired output from LLM is achieved.
- Create an enterprise level software for automating sales calls.

Netts Mobilitiy

Graphic Designer Intern

Amarawati, Andhra Pradesh (On Site)

Apr 2025 – July 2025

- Create visually appealing designs for NETTS Mobility's marketing materials, website and social media.
- Collaborate with the marketing and product teams to align designs with brand goals.
- Conduct design research to ensure visuals resonate with target audiences.
- Develop graphics, banners, posters, and other assets to enhance the brand's presence.

Projects

Crypto Wallet Finder - SIH 2023 Finalist

December 2023

- Developed Python-based web scraping tool to extract Ethereum, Bitcoin, Solana, and Monero wallet addresses, for fast and structured crypto-artifact collection.
- Implemented automated parsing using BeautifulSoup and Requests libraries to efficiently detect and export wallet IDs into CSV files for further analysis.

FileMon

May 2025

- Developed a cross-platform file transfer app with local IP-Based transfers to simplify seamless sharing across devices.
- Integrated end-to-end encryption via public key exchange, and open-sourced the project to encourage community driven enhancements.

Personal Virtual Homelab

May 2025

- Built a personal virtual home-lab with multiple operating systems to explore real-world offensive and defensive security environments.
- Configured networking, exploitation workflows (Metasploit) to strengthen hands-on penetration testing skills.
- Executed backdoor and remote access exploits on vulnerable VMs, deepening practical understanding of penetration testing and network security fundamentals.

Self-hosted firewall with WAZUH & SPLUNK Integration

October 2025

- Deployed Proxmox bare-metal virtualization to create a scalable environment to run isolated security-focused VMs.
- Configured Tailscale for secure remote access to the server from authenticated devices.
- Setup OPNSense as a network wide firewall with log forwarding to WAZUH and SPLUNK Enterprise for centralized monitoring and threat detection.
- Managed routing, DHCP, DNS and LAN monitoring to maintain a robust, well-organized network infrastructure.
- Integrated an OPENWRT Router to act as an access point to provide stable client connectivity through the firewall-secured environment.

Leadership & Activities

Open Source Community, VIT-AP

Amarawati, Andhra Pradesh

Track Lead

May 2024 – May 2025

- Overseeing departmental coordination and ensuring smooth execution of all club activities as the track lead.

Graphic Designer

October 2023 – May 2024

- Created dynamic graphics and layouts to enhance audience experience and speaker presentations during the live event.
- Developed creative concepts for digital and print media to drive audience engagement and brand recognition.

TEDxVITAP

Amarawati, Andhra Pradesh (On Site)

Stage Technician

April 2024

- Actively participated in core organization meetings as stage tech head, gaining hands-on experience in event production, vendor management, and technical stage management under tight timelines.
- Led stage technical operations, including equipment setup, live sound checks, and real-time troubleshooting to ensure seamless event execution.

Education

Vellore Institute of Technology, AP

Amarawati, Andhra Pradesh

B.Tech CSE, Specialization in Cyber Security, GPA 7.88

2022 - Ongoing

DAV, Ashok Vihar

Delhi, Delhi

CBSE 12th Board Percentage (best of 5): 76.5%

July 2022

Skills & Interests

Languages & Frameworks: Python, HTML, CSS, JS, React.js, JAVA, Linux

Tools/Platforms: Nmap, Hashcat, Wireshark, Git, Splunk, Wazuh, OPNSense Firewall, Ethical Hacking, Web Application Security

Creative Tools: Figma, Adobe Premiere Pro, Adobe After Effects, Davinci Resolve, Fusion 360, Blender-3D

Language: English, Hindi, Spanish (Ongoing learning)

Practical Labs: Setting up Windows Server, AD DS & AD CS, adding users, connecting domains, imitating real world Cyber Attacks and their mitigations

Courses/Certifications

- RHCSA - RedHat System Administrator 1
- JNCAA - Design, Associate Course
- AWS Academy Cloud Foundations from AWS Academy
- Introduction To Cyber Security - Great Learning Academy
- Cybersecurity Career Starter Certification - Hack & Fix Academy
- Harvard CS50
- WireShark Course by David Bombal - Udemey (Ongoing)
